DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Bourlon et al. (6,192,685). Bourlon et al. discloses a hydraulic brake apparatus with a tandem brake master cylinder having a rod piston 44 and a floating piston 60, the rod piston 44 moving in response to a brake-operating member, and the floating piston 60 moving in response to the rod piston 44, a separation valve 30 provided in a hydraulic brake circuit connecting the brake master cylinder and a brake wheel cylinder, the separation valve 30 being able to establish and shut off communication between the brake master cylinder and the brake wheel cylinder, a pressure control valve unit 22,24 for controlling fluid pressure to be supplied from an external fluidpressure supply source 12 to the brake wheel cylinder while the separation valve 30 is in a shutoff condition, and a stroke simulator piston 46 for allowing an idle stroke of the rod piston 44 and an idle stroke of the floating piston 60, while the separation valve 30 is in the shutoff condition, so as to ensure a stroke of the brake-operating member in accordance with an input load to the brake-operating member, wherein the idle stroke of the floating piston 60 starts during the idle stroke of the rod piston 44 and the simulator piston 46 starts it stroke after completion of the idle stroke of the floating piston 60 and before completion of the idle stroke of Art Unit: 3745

the rod piston 44 so as to ensure the stroke of the brake-operating member. See Bourlon et al. col. 5, lines 1-35.

Prior Art

Prior art made of record but not relied upon is considered pertinent to Applicant's disclosure and consists of six patents.

Drott et al. (6,808,238), Soga et al. (6,572,200), Sato et al. (6,554,089), Igaki et al. (6,488,109), Yoshino (6,464,307), and Kawahata et al. (6,425,644) are cited to show hydraulic brake apparatus.

Contact Information

Any inquiry concerning this communication or earlier communication from the examiner should be directed to Thomas Lazo whose telephone number is (571) 272-4818. The examiner can normally be reached on Monday-Friday from 8:00 am to 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor Edward Look, can be reached on (571) 272-4820. The fax phone number for this Group is (703) 872-9306.

Any inquiry of a general nature or relating to status of this application or proceeding should be directed to the Patent Application Information Retrieval (PAIR) system. For more information about the PAIR system, see http://pair-direct.uspto.gov.
